

Training in Maintaining Airport Lighting Systems

Offered on the WEB

Eliminate Travel Cost and Time Away From Your Job

This popular **3 1/2 day training** course for airport lighting maintenance personnel, is being offered on the WEB. There are 19^{1/2} hours of training presented by the same instructors who developed the AAAE ACE course; David Rainey and Seward Ford. The course is being offered at a cost of \$1025.00 per person. A course manual along with document CD will be sent to you as soon as you complete your registration. A course exam will be available for you to take and assess your knowledge of the material. A certificate indicating your successful completion of the course will be sent. Airport electrical design engineers and managers are also encouraged to take the course. The training course is available on site when requested and a sufficient number of participants are available to make the course economically practical. Register for the WEB version of the training course on page 2.

Subjects Included

- History of Airport Lighting
- Overview of Airport Lighting
- Airport Lighting Series Circuit
